

Mandatory Measures (5)

Note: Mandatory measures are those measures that are a requirement of accreditation and must be reported to URAC on an annual basis.

MEASURE	URAC DOMAIN	MEASURE NAME	MEASURE STEWARD	MEASURE DESCRIPTION	NUMERATOR	DENOMINATOR	DATA SOURCE
CM2013-01	Communication and Care Coordination	Medical Readmissions (Excludes Disability and Workers' Compensation Populations)	URAC	This measure assesses the percentage of the eligible population that participated in onsite general medical case management services or behavioral health case management services that had an unscheduled readmission to an acute care hospital within 30 days (<i>mandatory</i>) and within 72 hours (<i>exploratory</i>) of discharge.	The number of consumers in the denominator that had an unscheduled readmission to an acute care hospital during the measurement period stratified by within 30 days (<i>mandatory</i>) and within 72 hours (<i>exploratory</i>) after discharge. Discharges should be stratified by those that accepted and declined case management services.	All consumers who were admitted to an acute care hospital with a primary medical diagnosis (not a primary behavioral health diagnosis) during the measurement period and were referred to case management through an onsite general medical case management service at the time of discharge from the initial admission (i.e., index hospital admission).	Medical Records
CM2013-02	Prevention and Treatment	Percentage of Participants That Were Medically Released to Return to Work (Disability and Workers' Compensation Only)	URAC	This measure assesses the percentage of disability or workers' compensation case management cases that were managed for return to work and whose participants were medically released to return to work (RTW) in a specified time frame during the measurement period. This measure has two parts: Part A is for participants who received telephonic case management. Part B is for participants who received field case management.	Part A: The number of cases included in each denominator stratification where the participant was medically released to return to work, stratified by time (calendar days) between onset of lost time and receipt of a medical release to return to work. Part B: The number of cases included in each denominator stratification where the participant was medically released to return to work stratified by time (calendar days) between onset of lost time and receipt of a medical release to return to work.	The number of cases that were managed for return to work under a disability or workers' compensation case management program using (<i>Part A</i>) telephonic case management during the measurement period OR (<i>Part B</i>) field case management during the measurement period, both stratified by time (calendar days) between lost time and referral to case management.	Medical Records

Further, URAC may add and/or align its measures with regulatory requirements of federal, state, and local governments.

2023 CASE MANAGEMENT MEASURES AT A GLANCE

MEASURE	URAC DOMAIN	MEASURE NAME	MEASURE STEWARD	MEASURE DESCRIPTION	NUMERATOR	DENOMINATOR	DATA SOURCE
CM2012-03	Engagement and Experience of Care	Complaint Response Timeliness	URAC	This measure has two parts: Part A assesses the percentage of consumer complaints to the case management program to which the organization responded within the time frame that the program has established for complaint response; Part B assesses the average time, in business days, for complaint response.	Part A: The number of complaints in the denominator to which the organization responded within the target timeframe the case management program has established for complaint response. Part B: The sum of business days to respond to each consumer complaint counted in the denominator.	Count of all consumer complaints that the case management program received in the measurement period.	Administrative Data
CM2013-04	Engagement and Experience of Care	Overall Consumer Satisfaction (Excludes Disability and Workers' Comp)	URAC	The percentage of program participants who completed a consumer satisfaction survey and reported that they were "satisfied" overall with the case management plan during the measurement period.	The number of program participants in the denominator who reported that they were "satisfied" overall with the case management program.	All program participants who completed greater than (>) 50% of a consumer satisfaction survey during the measurement period.	Survey Data
CM2013-05	Communication and Care Coordination	Percentage of Individuals That Refused Case Management Services	URAC	This measure assesses the percentage of individuals eligible for and offered case management services that refused services during the measurement period.	The number of consumers in the denominator that refused case management services.	All cases eligible for case management services in which the consumer was contacted and offered case management services during the measurement period.	Medical Records

Exploratory Measures (1)

Note: Exploratory measures are measures “on the cutting edge”, meaning that either the industry has not come to consensus on how to measure a particular concept or the measure is experimental or in development. In the case of exploratory measure, the organization has the option to report.

MEASURE	URAC DOMAIN	MEASURE NAME	MEASURE STEWARD	MEASURE DESCRIPTION	NUMERATOR	DENOMINATOR	DATA SOURCE
DM2012-10	Engagement and Experience of Care	Patient Activation Measure	Insignia Health	The Patient Activation Measure (PAM) is a survey that assesses the knowledge, skills, and confidence integral to managing one's own health and health care. With the ability to measure activation and uncover related insights into consumer self-management competencies, care support and education can be more effectively tailored to help individuals become more engaged and successful managers of their health.	<p>Part A: The number of participants in the denominator who completed the PAM baseline survey.</p> <p>Part B: The number of participants in the denominator who were segmented into the appropriate activation level at baseline.</p> <p>Part C: The number of participants in the denominator who completed a PAM re-assessment survey.</p> <p>Part D: The number of participants in the denominator who moved to a higher activation level in the re-assessment survey from baseline.</p>	<p>Part A: All participants who received a PAM baseline survey.</p> <p>Part B: All participants who received and completed a PAM baseline survey.</p> <p>Part C: All participants who received a PAM re-assessment survey.</p> <p>Part D: All participants who received and completed a PAM re-assessment survey.</p>	Survey Data
